

Name.....

Class.....

Quadrilaterals

1. Quadrilateral A has 4 sides the same length. What type of quadrilateral is A ?

Circle all possible answers.

Rectangle *Square* *Parallelogram* *Rhombus* *Kite* *Trapezium*

2. Quadrilateral A has precisely 2 sides the same length. What type of quadrilateral is A ?

Circle all possible answers.

Rectangle *Square* *Parallelogram* *Rhombus* *Kite* *Trapezium*

3. Quadrilateral A has 4 angles the same size. What type of quadrilateral is A ?

Circle all possible answers.

Rectangle *Square* *Parallelogram* *Rhombus* *Kite* *Trapezium*

4. Quadrilateral A has no matching angles. What type of quadrilateral is A ?

Circle all possible answers.

Rectangle *Square* *Parallelogram* *Rhombus* *Kite* *Trapezium*

5. Quadrilateral A has no parallel sides. What type of quadrilateral is A ?

Circle all possible answers.

Rectangle *Square* *Parallelogram* *Rhombus* *Kite* *Trapezium*

6. Shape A has 2 pairs of parallel sides and no right-angles. What type of quadrilateral is A ?

Circle all possible answers.

Rectangle *Square* *Parallelogram* *Rhombus* *Kite* *Trapezium*

7. Quadrilateral A has 2 diagonals that bisect each other. What type of quadrilateral is A ?

Circle all possible answers.

Rectangle *Square* *Parallelogram* *Rhombus* *Kite* *Trapezium*

8. Quadrilateral A has 2 diagonals of different lengths. What type of quadrilateral is A ?

Circle all possible answers.

Rectangle *Square* *Parallelogram* *Rhombus* *Kite* *Trapezium*
